SNMP Agent, Database Engine, File Transfer and Boot Loader Development Project for RiT Technologies Next Generation PatchView for the Enterprise™ Unified Management System

WebSilicon (www.web-silicon.com) is developing SNMP Agent and Boot Loader for RiT Technologies (NASDAQ: RITT www.rittech.com) next generation PatchView for the Enterprise™ unified management system under an order received earlier this year.

“We are extremely proud to have RiT as a new customer and we are confident that once project is completed to RiT’s outmost satisfaction – new orders will follow, as happens with other WebSilicon customers” said Iftah Bratspiess, WebSilicon’s CEO.

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers development outsourcing services on a turnkey basis.

WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 25 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional R&D services to OEM’s, system integrators, service providers, and operating companies.

RiT Technologies ("RiT"), which was incorporated and commenced operations in 1989, is a world leading provider of integrated network management solutions for the communications market. RiT's extended line of integrated management solutions addresses the needs and demands of the rapidly evolving and changing markets in both telecommunications ("telecom") and data communications ("datacom").

In the telecom field, RiT's visionary solutions address the needs of the telephone companies ("Telcos") to increase customer satisfaction, increase revenues and decrease operating costs in order to compete with other access providers. RiT is engaged in the development, manufacture and sale of telco outside plant management and qualification systems that enables the telcos to capitalize on their copper infrastructure, their most valuable weapon in their competition with other access providers.

In the datacom field, RiT's revolutionary solutions address the needs of the vast and complex networks of enterprises by adding a new dimension to conventional network management: physical layer management capability.

PatchView for the Enterprise™ is a registered trademark of RiT Technologies.
