News Release

SNMP Agent for DMC Startex Networks' Spectrum II™ Digital Microwave Radio Link

WebSilicon Ltd. (www.web-silicon.com) delivered today to one of its customers the beta version of a Network Controller and SNMP agent customized to control and monitor DMC Stratex Networks' SpectrumII™ Digital Microwave Radio Link.

Based on WebSilicon's WS850 hardware platform, the embedded Network Controllers provides the customer with the ability to remotely control and monitor the link via standard LAN interfaces and protocols such as SNMP and Telnet. The customer will use the network controller in order to manage the SpectrumII™ microwave radio links using an existing SNMP based management system.

The released beta version supports DMC Stratex Networks equipment as well as other peripheral components such as power supply unit and other customer specific I/O. The embedded Network Controller supports remote configuration, activation, monitoring and alerting of the managed devices.

The hardware used (WS850) is a standard agent platform that was developed by WebSilicon. The same hardware platform is used in other projects for various customers worldwide. WebSilicon expects deliveries of the SpectrumII™ embedded Network Controller to begin during the 4th quarter of 2004.

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers development outsourcing services on a turnkey basis.

WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 35 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional R&D services to OEM's, system integrators, service providers, and operating companies.

Spectrum II is a registered trademark of Digital Microwave Corporation.
