News Release

## SNMP Agent Development Agreement Signed With Identify Software

WebSilicon ([www.web-silicon.com](http://www.web-silicon.com)) will develop SNMP Agent software for Identify Software Ltd. ([www.identify.com](http://www.identify.com)). The software to be developed will provide SNMP based management for Identify's AppSight™ Black Box system.

"We are proud to have Identify as our customer and we are confident that additional development orders will follow this specific agreement" said Iftah Bratspiess, WebSilicon CEO.

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers development outsourcing services on a turnkey basis.

WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 30 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional R&D services to OEM's, system integrators, service providers, and operating companies.

Identify Software delivers a comprehensive solution for application support. Identify's AppSight black box software pinpoints the root cause of problems in Windows, .NET and Java based applications running locally or at remote sites, on servers or clients.

Hundreds of enterprises and software vendors currently use AppSight to reduce application support costs and accelerate problem resolution throughout the application lifecycle.

Established in 1996 the company is headquartered in Israel and Raleigh, North Carolina, with offices throughout the US, Germany and the UK.
