# News Release

## Web Based Element Management Ordered by Yitran

WebSilicon ([www.web-silicon.com](http://www.web-silicon.com)) signed a contract to develop SNMP Agent board based on WebSilicon's WebMon platform and WBM based EMS for Yitran, a leading Power Line Communication (PLC) provider.

"Yitran's order, as a new customer, strengthens WebSilicon's dominance in the important sector of management solutions for mass production sophisticated products." said Mr. Iftah Bratspiess, WebSilicon CEO. "It is yet a new design-win for the WebMon platform, and it breaks the 10K units/year deployment barrier."

As component prices drop, together with increased awareness of end customers to connectivity issues of widely deployed products, the WebMon platform with the excellent price/performance ratio it offers is centered at the development roadmap of many new projects as well as enhancement programs of existing products.

With extensive background and vast experience in Network Management and Element Management Systems development, WebSilicon offers a rich set of fully customizable hardware and software products enabling management of devices in network environments using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with customers in the fields of telecom, datacom, optical systems, security, wireless, power systems etc. WebSilicon offers professional consulting, outsourcing and R&D services to OEM's, system integrators, service providers, and operating companies.

Yitran Communications Ltd. ([www.yitran.com](http://www.yitran.com)) is a fabless semiconductor company. Yitran Communications Ltd. designs, develops, and markets high performance, low cost PLC (Power Line Communication) modem chips and systems. Yitran's products provide robust and reliable communication over the existing electrical wiring and power grids and enable a variety of "No New Wires" applications, such as Home Automation, Command & Control, AMR (Automatic Meter Reading) and Internet distribution over power lines (in hotels and MDU/MTU markets). Yitran's customer and partner lists include leading companies, such as Renesas, Matsushita Electric Works, Hitachi, KEPCO, Kinden, LG and Microsoft
