## Web-Based Management Software (Java EMS) Delivered to Crescendo Networks

WebSilicon ([www.web-silicon.com](http://www.web-silicon.com)) delivered new Element Management software to Crescendo Networks. The software developed provides cross platform, Web based management for Crescendo Networks' Maestro platform.

Maestro platform was awarded the N+I Best of Interop award in the performance enhancement category at N+I Las Vegas held May 10-13. The Maestro platform to address both front-end and back-end application delivery issues for today's data center requirements. Web-enabled applications, high-speed networks, cluster and blade computing strategies and heightened business continuity standards have created new data center business demands for predictability, performance and efficiency. Leveraging the Maestro platform, IT professionals can now address barriers along the entire application delivery chain to enable business-critical applications while increasing server computing resources, decreasing outbound bandwidth, reducing latency and lowering capital and operational costs.

"We are proud to have Crescendo Networks as our customer and we are confident that additional development orders will follow this specific order" said Iftah Bratspiess, WebSilicon CEO.

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers development outsourcing services on a turnkey basis. WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 40 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional R&D services to OEM's, system integrators, service providers, and operating companies.

Crescendo Networks Ltd. was founded in early 2002 focused solely on delivering data center solutions for enabling business critical applications. Leveraging the company's Maestro platform, IT professionals can break application deployment barriers commonly associated with front-end and back-end application servers and networks.

Crescendo Networks Ltd. is a privately held company, backed by top tier VCs.
