News Release

SNMP Agent Software Delivered to Sungard

WebSilicon (www.web-silicon.com) delivered SNMP agent software to Sungard (www.sungard.com). Ordered in 2004, the software developed provides SNMP based management for Sungard's Knowledge Broker system.

"We are proud to have Sungard as our customer and we are confident that additional development orders will follow this specific order" said Iftah Bratspiess, WebSilicon CEO. "Sungard is our first major worldwide IT company as a customer. We expect further IT companies follow suit and implement SNMP based management interface to their customer's OSS systems. SNMP is adopted as management protocol not only for datacom and telecomm systems but also by the IT industry for high level OSS integration solutions.

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers development outsourcing services on a turnkey basis.

WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 40 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional R&D services to OEM's, system integrators, service providers, and operating companies.

Sungard is a global leader in integrated software and processing solutions, primarily for financial services. Sungard also helps information-dependent enterprises of all types to ensure the continuity of their business. Sungard serves more than 20,000 customers in more than 50 countries, including the world's 50 largest financial services companies. Sungard (NYSE:SDS) is a member of the S&P 500 and has annual revenue of \$3 billion.
