News Release

## Network Management Projects New Orders from New Customer, Based on Adventnet WebNMS™ platform

WebSilicon ([www.web-silicon.com](http://www.web-silicon.com)) received recently two development project orders from new customers to develop Network Managements Systems based on Adventnet WebNMS platform.

"To the best of our knowledge, those systems will be the first commercially released NMS products, by Israeli vendors, that will be based on WebNMS platform" said Yossi Appleboum, WebSilicon VP R&D" Our task is to develop a customized NMS based on the WebNMS platform and to integrate it with vendors product."

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers development outsourcing services on a turnkey basis.

WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 45 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional R&D services to OEM's, system integrators, service providers, and operating companies.
