News Release

New Software Development Order Received from Flash Networks

WebSilicon (www.web-silicon.com) received an order to develop the next version of the Element Management software for Flash Networks. The new cross platform Web based manager will manage the Next Generation product developed by Flash Networks.

“We are proud to be Flash Networks partner for developing their network management products.” said Mr. Iftah Bratspiess, WebSilicon CEO. “Being the 3rd EMS order received from Flash since 2002, we are confident that this order will be executed to Flash’s full satisfaction. We at WebSilicon see great importance in establishing long-term relationships with its customers, thus leveraging our expertise to our customers’ benefit”.

As the requirement for advanced network management capabilities becomes a mandatory requirement for vendors integrating their products within customers’ infrastructure, WebSilicon offers the most up to date architecture and competitive solutions for satisfying this demand with minimal cost, risk, and delivery time.

With extensive background and vast experience in Network Management and Element Management Systems development, WebSilicon offers a rich set of fully customizable hardware and software products enabling management of devices in network environments using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with customers in the fields of telecom, datacom, optical systems, security, wireless, power systems etc. WebSilicon offers professional consulting, outsourcing and R&D services to OEM’s, system integrators, service providers, and operating companies.

Flash Networks (www.flashnetworks.com) creates innovative, industry-leading solutions for mobile operators looking to deliver the best possible user experience for their data customers, whether over 2.5G, 2.75G, 3G or advanced (HSDPA and EVDO) networks. Flash’s end-to-end solutions slash response speed and download time while supplying a holistic view of the end-user Quality of Experience -- from service creation to monitoring, enforcement, enhancement and reporting. Flash’s NettGain™ platforms have been deployed commercially by over 40 top-tier wireless carriers worldwide, including T-Mobile, Vodafone, SFR, Orange and many others.
