# News Release

## SNMP Agent board and Embedded Web Sever Based EMS delivered to RAD-OP Optical Communication Technologies Ltd

WebSilicon ([www.web-silicon.com](http://www.web-silicon.com)) released an SNMP Agent board based on WebSilicon's WebMon platform and WBM based EMS to RAD-OP Optical Communication Technologies Ltd.

“Gaining RAD-OP as a new customer strengthens WebSilicon’s dominance in the important sector of management solutions for Optical Systems.” said Mr. Iftah Bratspiess, WebSilicon CEO. “In addition, The WebMon based embedded SNMP controller for RAD-OP systems marks a double celebration for us: It is the 12<sup>th</sup> design-win for the WebMon platform, and it breaks the 10K units/year deployment barrier.”

As component prices drop, together with increased awareness of end customers to connectivity issues of widely deployed products, the WebMon platform with the excellent price/performance ratio it offers is centered at the development roadmap of many new projects as well as enhancement programs of existing products.

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers development outsourcing services on a turnkey basis.

WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 45 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional R&D services to OEM’s, system integrators, service providers, and operating companies.

RAD-OP ([www.rad-op.com](http://www.rad-op.com)) is a leader in the development of proprietary free-space optics technologies. The Company is led by an experienced team of engineers with extensive experience in the fields of communications, physics, electronics, mechanical design and free space optics solution development.

RAD-OP is a member of the prestigious RAD Group ([www.rad.com](http://www.rad.com)), a family of 15 independent companies operating worldwide. All RAD Group Companies share a common vision to develop, produce and market solutions for diverse segments of the networking and telecommunications industries. Six RAD Group companies are currently traded on the NASDAQ; the remaining Companies are privately held by the Group's founders as well as several leading venture capital firms.
