News Release

WebSilicon provides EMS and NMS solutions for Celtro's DynaMate Product Family

WebSilicon (www.web-silicon.com), a leading provider of device and network management solutions, announced that it was selected by Celtro to provide an integrated EMS/NMS solution for the DynaMate access switch for mobile backhaul networks.

The DynaMate Management System (DMS) fully supports FCAPS functionality for managing DynaMate products in a network environment.

Based on client-server architecture, the DMS package is a key enabler for mobile operators offering 2G and 3G transport services over variety network infrastructures. In conjunction with the DynaMate systems, the DMS delivers the best of mobile backhaul traffic awareness, together with extensive and detailed reports on network and traffic behavior.

“A user-friendly user interface provides a birds-eye view of the network and an easy drill-down from any network segment to any managed DMT element.” said Mr. Yossi Appleboum, VP R&D of WebSilicon. “The system supports networks of up to 10,000 DynaMate terminals with up to 100,000 connections and provides an uplink to umbrella management system.”

Active since 1998, with track record of over 70 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional EMS and NMS platforms and professional services to OEM's, system integrators, service providers, and operating companies.

Celtro, Headquartered near Tel Aviv, Israel with offices in Petah Tikva and the U.S., was founded in 2001 as a business unit within ECI Telecom and was spun-off in 2003 as a privately-owned, independent company.

Celtro's innovative cellular backhaul traffic aggregation and optimization solutions help mobile operators to improve service delivery and increase network efficiency – while lowering CapEx and OpEx.

Focusing solely on the cellular backhaul market, Celtro delivers field-proven backhaul solutions already in use by leading tier-1 operators worldwide. Celtro DynaMate products are currently in use by more than 15 worldwide leading mobile operators, serving over 200 million subscribers in Europe, Africa and Latin America.
