News Release

## WebSilicon provides an SNMP and Client/Server Interfaces for Vigilant Elite – Integrated Video Server and RAID5 Solution

WebSilicon ([www.web-silicon.com](http://www.web-silicon.com)) delivered an SNMP interface and a new Client/Server EMS for Vigilant Elite – integrated video server and RAID5 solution.

The SNMP and Client/Server interfaces provide the means for integrating the Elite video system within multiple control centers that operate simultaneously across remote sites.

The Vigilant Elite Series is a high-end integrated IP video server designed for users that require robust, cost-effective image viewing and recording in real-time. Equipped with high resolution, full-frame rate and audio capabilities, the Elite Series is suited for applications where every detail needs to be captured.

The EMS and agent are based on the modular flexible EMS/NMS architecture of WebSilicon and are designed to ensure no single point-of-failure. The system can be easily scalable to support unlimited input channels.

“We are proud to have Vigilant as our customer and we are confident that additional development orders will follow this specific order” said Iftah Bratspiess, WebSilicon CEO.

With extensive background and vast experience in Network Management and Element Management System development aspects, WebSilicon offers platforms and professional development services on a turnkey basis.

WebSilicon develops fully customized hardware and software products, enabling management of devices in network environment using standard protocols and cross-platform Web-Based Management architecture.

Active since 1998, with track record of over 70 successfully accomplished projects for customers in telecom, datacom, optical systems, power, etc. WebSilicon offers professional EMS and NMS platforms and professional services to OEM’s, system integrators, service providers, and operating companies.

Vigilant Technology is a leading provider of intelligent IP based digital video/audio solutions for high-end CCTV security and surveillance markets.

Vigilant’s portfolio is designed for large-scale installations in mission-critical, multi-user application environments and offers solutions ranging from high-end DVRs to IP encoders and NVR solutions – addressing sophisticated requirements while maintaining flexibility for system designers and integrators.
